

Key Features

HyperKewl Evaporative Cooling:

- Provides extended relief from heat fatigue and heat stress
- Lightweight, durable and non-toxic
- Easy to activate and re-usable
- 5-10 hours of cooling relief per soaking 6 to 12°C lower than the outside temperature!

How it works ?

- A water management system created from the HyperKewl™ fabric absorbs & releases water within the multi-layered material.
 - A. Simply submerge the product in water for 1 minute allowing the HyperKewl™ fabric to absorb the water
 - B. Gently squeeze out the excess water, wipe dry and wear
- Before first use; Follow activation proceeding above and let the product dry completely. This is necessary for the cooling fabric fibres to set into the product. Product could feel 'slimy' because of fibre migration after the first activation, this rinse away on the next soaking.
- For washing : Soap and water only (until 100 washings)

Crown cooler:

- Protect the dangerous heat
- Hook & loop conveniently attaches easily to V-Gard Helmet suspensions
- Colors: Royal Blue

Crown Cooler with Neck Shade

- Protect neck and head from dangerous heat and sun
- Hook & loop conveniently attaches easily to V-Gard Helmet suspensions
- Colors: Hi-Viz Lime (meets EN471 requirements)

Ordering Information

Description	P/N
Crown cooler	GA90022
Crown + Neckshade Cooler	GA90023

Technical Specifications

Matériel	
Outer	Water Repellent Nylon
Inner	Nylon
Hook & Loop	Black poly-cotton
Approvals	
Standard	<ul style="list-style-type: none"> • CE certified (PPE Category 1) • Boths have been tested satisfactorily in our laboratory to EN 397 • Accessories in V-Gard certificate • Crown + Neckshade High-Visibility meets EN 471 requirements
General	
Weight	Crown : 18 g Crown + Neckshade : 55 g
Packaging	Individual unit plastic bag, Polybag of 20 pcs
