Part I
Safety

Introduction

This document contains information and safety regulations which are to be observed without fail for safe operation of the mobile phone **ADVANTAGE 1.x** under the described conditions. Non-observance of this information and instructions can have serious consequences and / or may violate regulations.

Please read the manual and these safety instructions before using the phone. In case of contradicting information, the text of these safety instructions shall apply.
In case of any doubt, the German version shall apply.

The current EC declaration of conformity, EC and IECEx certificates of conformity, safety instructions and manual can be found at www.isafe-mobile.com, or requested from i.safe MOBILE GmbH.

1 Specifications

1.1 Ex-Specifications

The **ADVANTAGE 1.x** is a mobile phone suitable for use in potentially explosive atmospheres (zones 1, 21, 2 and 22) in accordance with directives 94/9/EC (ATEX 95) and 99/92/EC (ATEX 137), as well as the IECEx scheme.

Ex-markings

ATEX: ⟨Ex⟩II 2G Ex ib IIC T4 Gb

97922 Lauda-Koenigshofen
Germany

1.2 Technical Specifications

Frequencies

GSM 850 / 900 / 1800 / 1900 MHz
3G 850 /1900 / 2100 MHz

Supported networks

WWAN (HSPA/EDGE/GPRS/GSM)

Dimension

63 mm X 127 mm X 24 mm

Screen size

2,2 in QVGA

Camera

2,0 MP (only ADVANTAGE 1.0)

Wireless technologies

Bluetooth

Battery

1000 mAh

Operating Temperature

-20°C ... 60 C

Memory

Micro-SD, supports up to 16GB

1.3 Variants

ADVANTAGE 1.0 is equipped with a 2 MP camera,
ADVANTAGE 1.1 is not equipped with a camera.

2 Safety Instructions

2.1 Faults and Damages

If there is any reason to suspect that the safety of the phone has been compromised, it must be withdrawn from use and removed from any ex-hazardous areas immediately.
Measures must be taken to prevent any accidental restarting of the phone.

The safety of the phone may be compromised, if, for example:

- malfunctions occur.
- the housing of the phone or the battery shows damage.
- the phone has been subjected to excessive loads.
- the phone has been stored improperly.
- markings or labels on the phone are illegible.

It is recommended that a phone which shows or which is suspected of faults and damages is returned i.safe MOBILE GmbH for inspection.

2.2 Ex-relevant Safety Regulations

Use of this phone assumes that the operator observes the conventional safety regulations and has read and understood manual, safety instructions and certificate.

The following safety regulations must also be complied with:

- Inside ex-hazardous areas all openings of the phone must be closed. The battery has to be fixed by the two screws and the covers of the USB and Headset interfaces have to be closed.
- The battery may only be exchanged or charged outside ex-hazardous areas.
- The phone may only be charged outside ex-hazardous areas using the i.safe PROTECTOR USB-cable or other equipment approved by i.safe MOBILE GmbH.
- USB-connections to other equipment are only allowed outside ex-hazardous areas using the i.safe PROTECTOR USB-cable or other equipment approved by i.safe MOBILE GmbH.
- Use only the appropriate battery type BPA01A.
- It is not allowed to carry spare batteries into ex-hazardous areas.
- The phone may be charged only at temperatures in between 0°C ... 45°C.
- The phone must not be exposed to abrasive acids or bases.
- The phone must not be taken into zones 0 or 20.
- Only accessories approved by i.safe MOBILE GmbH may be used.

2.3 Further Safety Advises

- Do not touch the screen of the phone with sharp objects. Dust particles and nails may scratch the screen. Please maintain the screen clean. Remove dust on the screen with a soft cloth gently, and do not scratch the screen.
- Charge the phone under indoor conditions only.
- Please do not put the phone in environments with excessive temperatures, as this could lead to heating of the battery, resulting in fire or explosion.
- Do not charge the phone near any flammable or explosive substances.
- Do not charge the phone in environments with much dust, humidity, or excessively high or low temperatures (the permitted charging temperature range is 0 ... 45°C).
- Do not use the phone in areas where regulations or legislatives prohibit the use of a mobile phone.
- Do not expose the phone, battery or charger to strong magnetic fields, such as are emitted from induction ovens or microwave ovens.
- Do not attempt to open or repair the phone. Improper repair or opening can lead to the destruction of the phone, fire or explosion. Only authorized personnel are allowed to repair the phone.
- Only use accessories approved by i.safe MOBILE GmbH.
- Please do not directly connect the poles of the battery to avoid short-circuiting the battery.
- Power off the phone in hospitals or other places where the use of mobile phones is prohibited. This phone may affect proper work of medical equipment, such as pacemakers, so always keep a distance of at least 15 cm between the phone and these devices.
- Observe all corresponding laws that are in force in the respective countries regarding the use of mobile phones while operating a vehicle.
- Please power off the phone and disconnect the charging cable before cleaning the phone.

- Do not use any chemical cleaning agents to clean the phone or the charger. Use a damp and anti-static soft cloth for cleaning.
- Do not discard old and abandoned lithium batteries into the trash, send them to designated waste disposal locations or return them to i.safe MOBILE GmbH.
- The user alone is responsible for any and all damages and liabilities caused by malware downloaded when using the network or other data-exchange functions of the phone. i.safe MOBILE GmbH cannot be held responsible for any of those claims.

Warning

i.safe MOBILE GmbH will not assume any liability for damages caused by disregarding any of these advices or by any inappropriate use of the phone.

3 i.safe PROTECTOR

The **ADVANTAGE 1.x** contains specially designed safety circuits. Connecting the phone to non-ex-approved equipment like a computer can endanger the safety of the phone, as faults in the non-approved equipment could lead to a power surge into the phone large enough to destroy the safety circuits.

The i.safe **PROTECTOR** is a USB-cable for connecting the phone with non-ex-approved equipment. It contains additional safety circuits to protect the phone from possible faults in the non-ex-approved equipment.

For this reason, charging and USB-connections are only allowed using the i.safe **PROTECTOR**.

Part II
Quick start

Throughout this guide, the following formats are used:

- **[OK]**, **[SEND]** signify physical keys to be pressed.
- ***<Menu>, <Settings>*** represent text options on the screen of the phone that have to be selected by using the keys.

1 Keys

[1] Power: Long press to power the phone up or down.
Short press to lock the phone.

[2] Send: Bring up the call log or answer a call when the phone is ringing.

[3] End: Return to homescreen from any menu.
End or reject a call.

[4] Menu: While on the homescreen: enter settings.

[5] Clear: Deletes your selection.

[6] Navigation: 4-way navigation through menus.

[7] OK: Confirm the selected item or function.

[8] Keypad: Use for text or number entry.

[9] Volume: Adjust the volume.

[10] Camera: Take a picture when in camera mode.
(only valid for ADVANTAGE 1.0).
Long press for switching torch on or off.

[11] SOS: Long press to activate the SOS-alert and call a pre-defined number sequence.

2 Status Icons

These icons will be displayed in the status bar in the upper part of the display.

	Current Signal Strength
	Battery power level indicator
	GPRS Connection
	EDGE Connection
	UMTS Connection
	Bluetooth active
	Call in progress
	Missed calls
	Flight mode
	ringtone only
	vibration only
	vibration and ringtone
	mute
	New SMS
	New MMS
	New voice mails
	Alarm clock active
	MP3 playing
	FM radio active

3 First Steps

3.1 Battery

The battery is inserted into the back of the mobile phone. The battery is not fully charged when the mobile phone is purchased, but it contains enough energy to power on the phone. To obtain best battery performance and battery life, let the battery discharge completely before charging it completely for the first three charging cycles.

3.1.1 Installing and Extracting the Battery

When installing the battery, insert the teeth at the top of the battery into the corresponding notches of the mobile phone, then press the battery down and secure it by turning the two screws with the included screw driver (TORX T8). Ensure that the battery is safely in place before powering on the phone.

3.1.2 Charging the Battery

Connect the i.safe **PROTECTOR** USB-cable with the phone as indicated in the picture below:

Connect the plug with the socket of the power supply.
After charging, remove the USB-cable from the charger.

3.1.3 Battery Use

In actual use, the standby time and talk time of the mobile phone varies with the network status, working environment and usage.

When the power of the battery is lower than normal, the phone will prompt you to charge it. Please charge the battery; otherwise you may lose any files which are not saved.
If you do not charge for a long time, the phone will be powered off automatically.

Warning:
The phone may only be charged at ambient temperatures in a range from 0°C ... 45°C. Please do not use charging equipment if the temperature exceeds this range. Only use the i.safe **PROTECTOR** USB-cable to connect to a charger. Using any other cable may cause danger and will void the warranty.

3.2 Installation of the SIM Card

The SIM-card holder is placed in the battery compartment. Please remove the battery to gain access to the holder.

Unlock the SIM-card-holder by sliding it forward as indicated on the holder. Open the holder and insert the SIM-card. Close the holder and lock it again to safely retain the SIM-card.

Warning:
Do not try to insert or remove the SIM card when any external power supply is connected, otherwise the SIM card or the mobile phone may be damaged.

3.3 Installation of the Micro-SD Card

The SD-card holder is placed in the battery compartment. Please remove the battery to gain access to the holder.

Unlock the SD-card-holder by sliding it forward as indicated on the holder. Open the holder and insert the SD-card. Close the holder and lock it again to safely retain the SD-card.

4 How to Localize the Phone

With the phone showing the home screen, press **[OK]** and select settings. In *<Phone settings>*, in the item *<Time and date>* and *<Language>* you can change the settings according to the local time zone, language, date format, etc.

5 How to use Contacts

5.1.1 Add a New Contact

In the contact list, press **[LSK]** and select *<Add new contact>* to access the editing interface for the new contact.
In the editing interface, input the contact name, number, email and etc., then press **[LSK]** to save all the information.
You may choose any image from your pictures to add as a contact picture. To add more information, you can choose *<Add detail>*.

5.1.2 Edit Contact Information

In the contact details, press **[LSK]**, then choose *<Edit>*.

Delete contacts

In the contact list, press **[LSK]**, choose *<Delete>* , press **[LSK]** to confirm;
If you want to delete more, press **[LSK]**, choose *<Mark>* , select contacts to delete or < All>, press **[LSK]**, choose *<Delete>* , press **[LSK]** to confirm;

Speed find

In the contact list, input letters to find the contact. (For example: if want to find „Eric", press **[3] [7] [4] [2]**.)

6 How to use Profiles

Profile settings can help you to set the ringing tone, message alert tone, volume, notification type and etc. Profiles modes include ***<General>***, ***<Silence>***, ***<Meeting>***, ***<Outdoor>***, ***<Flight>***, ***<Headset>***, ***<Customized>***.
In the main menu, select ***<Profiles>*** to set or edit any of these profiles.

Profile settings

In ***<Profiles>*** menu, select the profile you prefer to set ***<On>***.

Editing a Profile

In ***<Profile>*** menu, Press **[LSK]** to select Settings.
Set the options. You can change the ***<Call alert type>***, the ***<Volume level>*** and the ***<Keypad tone>***.
In Standby mode, the current profile settings and ring mode is displayed in the status bar on the top of screen.

Display settings

Set the theme, wallpaper, and shortcuts.

Ringtone settings

Here you can change the settings for the call default, SIM, voice call and message ringtones.

7 How to use Network functions

This phone supports wireless application protocol WAP and WWW service. Please make sure Internet service is available for SIM before using the function. The network service providers provide the fee information and other specific settings.
You can access different Internet services such as news, weather reports, flight information, etc. These services are especially designed for mobile phones and maintained by WAP / WWW service providers.
Network service is necessary for WAP. Please contact your network provider and/or the service provider of the desired service. The service provider will also provide instructions about how to use their service.

Important:
Information regarding the fees and other specific settings are provided by the network service providers.

For using the above mentioned services the APN (access point name) settings have to be installed for the network settings of the phone. The APN settings are provided by the network provider. They are unique for every provider. Please ask your provider or look at their webpage for the correct settings.

Settings for T-Mobile

Account name:	T-Mobile INTERNET
APN:	internet.t-mobile
Username:	t-mobile
Passwort:	tm

To enter the APN settings navigate to *<Settings>* → *<Connectivity>* → *<Data account>* → *<Options>* then select *<Add>* and enter the provider specific settings.

8 How to use Email

8.1 Setup

Navigate to *<Menu>* → *<Messages>* → *<Email>* to enter the email app.

Choose *<Option>* → *<Settings>* to set up a new email-account.

There are 3 default templates. These can be changed to your preferred settings or you can build a new profile.
To edit an existing account, select the account, choose *<Setting>* and add your account information.

Depending on your email service provider, you might need to change the settings for the incoming and outgoing server.

Choose *<Option>* → *<Settings>* to use your account.

8.2 Write an Email

Navigate to *<Menu>* → *<Messages>* → *<Email>* to enter the email app.
Enter *<New mail>*, compose your message and choose *<Option>* → *<Send>* to send out the email.

8.3 Receive an Email

Navigate to *<Menu>* → *<Messages>* → *<Email>* to enter the email app.
Select *<Inbox>* → *<Option>* → *<Retrieve>* to receive new emails.

9 How to Use Messages

9.1 Send a Message

Navigate to *<Menu>* → *<Messages>* → *<SMS>* to enter the SMS app.
Navigate to *<Menu>* → *<Messages>* → *<MMS>* to enter the MMS app.

To create and send a SMS/MMS message, choose *<New SMS>* / *<New MMS>* to create a new message.

Input the phone number or choose a number from *<Contacts>*.

Compose your message text and select *<Option>* → *<Send>* to send it.

When composing an SMS, select *<Option>* → *<Insert>* to insert Contact info, Text templates or Calendar events.
When composing an MMS, select *<Option>* → *<Insert>* to insert pictures, videos or sounds.

9.2 Read a New Message

When a new SMS or MMS message I received, a message box pops up. To read the message, press **[OK]**, to ignore the message press **[RSK]**. If you ignore the new message, the missed message icon (see page 16) appears in status bar.

10 How to Use the Camera (ADVANTAGE 1.0 Only)

To take a picture, press **[OK]** or the [**Camera key]** when you are on the homescreen. You can then delete, send and rename the picture taken or set it as wallpaper or contact picture, slideshow, etc.

Record a video

To record a video, press **[OK]** when you are on the homepage, select ***<Pause>*** to pause recording or ***<Stop>*** to stop recording. You can then delete, send, rename or play the video recorded.

11 How to Use Bluetooth

Bluetooth technology enables wireless connections between electronic devices within a range of up to 10 meters. A Bluetooth connection can be used to send images, videos, texts, business cards, calendar notes, or to wirelessly connect to other devices using Bluetooth technology.
When Bluetooth connections are made, the distance between phone and Bluetooth device will greatly influence transfer speed and the quality of talk.

Select *<Main menu>* → *<Extra>* → *<Bluetooth>* to access the function.
You can then adapt the function according to your needs.

11.1 Transmitting Documents via Bluetooth

Activate Bluetooth and set the option *<My phone's visibility>* as *<Visible to all>*.
To look for new devices, choose *<Device list>* *<Search>*.
If you have already paired your phone with other Bluetooth devices, a list of the previous search results is displayed.
Select the device with which you want to pair and enter the password. Depending on the other Bluetooth device, the same password may be necessary to be entered for this device, too.

11.2 Using a Bluetooth Headset

If you have not already paired the headset with your phone, please follow the instructions in chapter 11.1 before continuing.

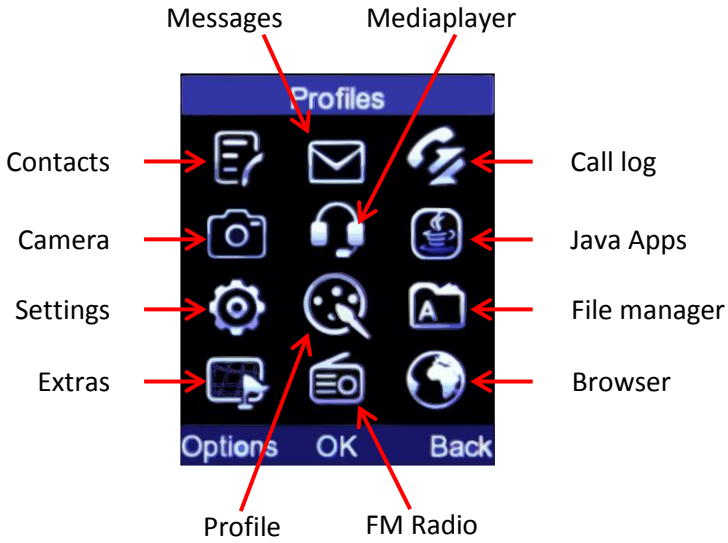
Activate Bluetooth and set the option ***<My phone's visibility>*** as ***<Visible to all>***.
If the headset is successfully paired with the phone, it will be shown in the device list. Select the headset, and choose ***<Bluetooth earphone>*** to active the earphone function.

Notice
The Bluetooth icon (see page 16) will be shown when Bluetooth is active.

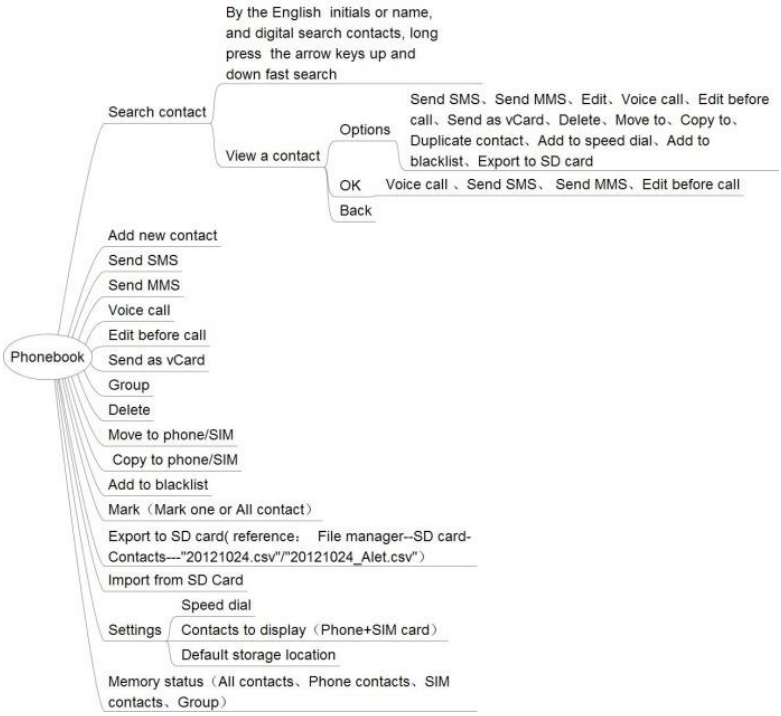
Part III
All Options

1 Main Menu

To access the main menu, press **[OK]**, **[Menu]** or choose the option ***<Menu>*** with the **[LSK]**, where available.



2 Contacts



You can manage your contact information in contacts menu.

Notice
If contacts are saved on the USIM/SIM card, only the contact name and one number can be recorded per contact.

In main menu, choose ***<Contacts>*** to access the contact list. The contact list displays name and storage location. You can press **[SEND]** to make a call.

2.1 Search Contacts

2.1.1 Search

In the main screen of the Contacts menu, you can directly start your search by pressing letters on the keypad. With every letter added to the search, the results will be more close to your search.
Please note that the search function does not differentiate between first or last name.

2.1.2 View a Contact

In the contacts list, click the contact to view details.

Options

Press **[LSK]** for the option menu:

Send SMS
Send a SMS to this contact.

Send MMS
Send a MMS to this contact.

Edit
Edit the information of this contact.

Voice call
Make a voice call to this contact.

Edit before call
Copy the number to the dialer and edit it before call.

Send as vCard
Send Via SMS or Bluetooth.

Delete
Delete the contact.

Move to
Move the contact from phone to SIM Card or from SIM Card to phone. Then, the contact will be not saved in the previous location.

Copy to
Copy the contact from phone to SIM Card or from SIM Card to phone.

Duplicate contact
Duplicate this contact in the same storage location.

Add to speed dial
Add as one of 8 speed dials and choose a number from 2-9 as the speed dial number.

Add to blacklist
Press **[OK]** to add any number into the blacklist.

Export to SD card
Export contacts from phone to SD card.

OK

Press **[OK]** to select the marked contact. You will see the details of the selected contact and can select which number to use. Pressing **[OK]** again will show you the following selections:

Voice Call
Start the call by dialing the number first.

Send SMS
The SMS menu will pop up and a SMS can be created and send to the selected number.

Send MMS
The MMS menu will pop up and a MMS can be created and send to the selected number.

Edit before Call
The selected contact number can be modified before dialing.

Back
Press **[RSK]** to go up one step to the previous menu.

2.2 Other Options
In the contact list, press **[LSK]** for the option menu:

Add new contact
Enter the editing interface for the new contact and choose the contact to be saved in the phone or SIM Card. Input the contact name, number, email and etc., and then press **[LSK]** to save all the information.

Send SMS
Send a SMS to this contact.

Send MMS
Send a MMS to this contact.

Voice call
Make a voice call to this contact.

Edit before call
Copy the number to the dialer and edit it before call.

Send as vCard
Send contact as vCard via SMS or Bluetooth.

Group
View all the contacts in groups, or add new groups, or send messages to a group, or edit/delete groups

Delete
Delete this number from contacts.

Move to
Move contacts from phone to SIM Card, or from SIM Card to phone. Then, the contact will be not saved in the previous location.

Copy to

Copy contacts from phone to SIM Card, or from SIM Card to phone.

Add to blacklist

Press **[OK]** to add any number into the blacklist.

Mark

Mark contacts to send SMS/MMS, send as vCard, delete, move to, copy to, add to backlist or export to SD card.

Export to SD card

Export contacts from phone to SD card. Choose to export contacts directly, and then you can find the contact file in SD card. The file name will be according the actual date: 20130522.csv for example.

Import from SD card

Import contacts from SD card to phone. Choose to enter **File** manager, switch to SD card to select the contact file, and press **[OK]** to start importing.

Settings

Speed dial

Here the speed dial numbers can be implemented. Means the implemented number is fixed on the number in the front and this number stands for the number on the keypad. If there's a number installed at (2), you can dial these number if you long press **[2]** on the keypad.

Contacts to display

Here can be selected which contacts will be shown, just the contacts in the SIM card or just the contacts stored in the phone or both.

Default storage location

Choose either the main memory of the phone or the SIM card for storage.

Memory status

All contacts
Shows how many contacts are stored in the phone and at the SIM in once; additionally there are also the maximum value of storage shown.

Phone Contacts
Shows how many contacts are already implemented and the maximum capacity of contacts.

SIM Contacts
Shows how many contacts are already implemented and the maximum capacity of contacts.

Group
Shows how many Groups are used or generated.

3.1 SMS

3.1.1 New SMS Options

Add from Contacts (one or all)

Select the contact(s) where the SMS should be sent to.

Safe to drafts

The written SMS can be stored inside the location “drafts” without sending and can be sent later maybe.

Save as template

In the case the written Message can be used very often, it makes sense to store the Message as a template and then it can be used always when needed.

Insert

Additional to the text which can be written by the user, some information can be implemented very easily by using the „insert“ function. Here the contact information of any contact can be selected and implemented, also a template text or a calendar event to be send by SMS.

Contact info
A contact can be selected to be implemented into the SMS.

Text template
An offered text template can be implemented.

Calendar event
A calendar event can be selected and implemented as a text message to be sent out.

Send

Is sending out the SMS to the selected contact.

3.1.2 Check the Message From Inbox

First view after selecting SMS in message menu.

Reply
Send an answer back.

Forward
Forward the incoming SMS to someone else.

Voice call sender
Give the sender a call.

Edit before call
Modify the number before dialing, for e.g. add a +49 in front, …

Save to contacts
Save the sender's number to the contact list of the phone.

New contact
Create the contact out of the sender's number.

Existing contact
Add the number to an existing contact.

Delete
Delete the complete SMS.

Move to phone / (U)SIM card
Transfer the SMS to the SIM card or to the phone storage.

Export to SD card
Transfer the SMS to the SD card.

Extract Details
Show's the details of the SMS, like phone number, …

Add to Blacklist

Add the phone number to the blacklist. The phone will not recognize a call, SMS, … from senders in the blacklist.

View by location

Here the storage location can be selected to show up.

3.1.3 Sent, Drafts, Outbox Options

Resend

Send the SMS again, maybe if the first try was not successful.

Delete

Delete the selected SMS.

Delete more

Delete more SMS by selecting them.

Settings

More settings can be adjusted.

SMS Settings

Change/modify the SMS settings.

Service Centre

Phone number of SMS service center can be modified, will be done automatically after switch on the phone the first time with the used SIM card.

Deliver report

Here a delivery report can be activated or not.

SMS type

Selection of different types of SMS, default is: TEXT.

Validity period

The validity period of the SMS can be selected, default is: maximum.

Save sent SMS
Selection of storage the sent SMS or not.

Text template
An existing template could be selected and send as SMS, or a new one can be generated.

Cell broadcast
Allow to receive a broadcast SMS from a sender, which has to be implemented by the phone number.

Storage status

Show's the current storage status of SIM card and phone. The phone can store maximum 2000 SMS, the SIM card 20.

3.2 MMS

3.2.1 New MMS Options

Add from contacts (one or all)

Select the contact(s) where the MMS should be sent to.

Save do drafts

The created MMS can be stored inside the location “drafts“ without sending and can be send later.

Insert

Additional to the text which can be written by the user, some information can be implemented very easily by using the „insert“ function. Here the below explained topics and additionally a template text or a calendar event can be implemented and send by MMS.

Insert picture/video

Here a picture or a video can be selected, stored on the phone/SD card and added, or created new and added as well.

Insert Sound

Select an existing sound to add or create a new one and add to the MMS.

Insert other

New slide

A slide can be selected to be implemented into the MMS.

Contact info

A contact can be selected to be implemented into the MMS .

Text template

An offered text template can be implemented.

Calendar event
A calendar event can be selected and implemented as a text message to be sent out.

Attachments
Select whatever to attach to the MMS.

MMS controls
Check the created MMS again, do some modifications, …

Add subject
Possibility to add a subject, like at an email.

Add CC / BCC
Add more receiver(s), like at an email.

Send
Send out the MMS to the selected receiver(s).

3.2.2 Check the Message From Inbox
First view after selecting MMS in message menu.

Download / play
Start the download of a received movie and play them.

Reply
Send an answer backto the sender.

Forward
Forward the incoming MMS to someone else.

Voice call sender
Give the sender a ring/call.

Edit before call
Modify the phone number before dialing, for e.g. add a +49 in front, …

Save to contacts
Save the sender’s number to the contact list of the phone.

New contact
Create a new contact out of the sender's phone number.

Exisiting contact
Add the phone number to an existing contact.

Delete
Delete the complete MMS.

Extract Adress
Shows the details of the sender's address, like phone number, …

Extract details
Shows all the content details of the MMS.

Attachment
Lists all the attachments of the MMS.

3.2.3 Sent Drafts Outbox Options

Similar to the SMS settings, please see chapter 3.1.3.

3.3 Email Options

Create or change your email account settings, getting information…

3.3.1 Settings

One of the existing accounts can be selected to edit.

Edit
Edit the selected account.

User information
Implement the email address, password

Connection
Implementation of the server settings, like in point 8 explained.

Msg preference
Fix the email behaviors, like maximum size, download mode, …

Signature
Create a signature, which can be added at the end of the email.

Rename
Change the account name – optional.

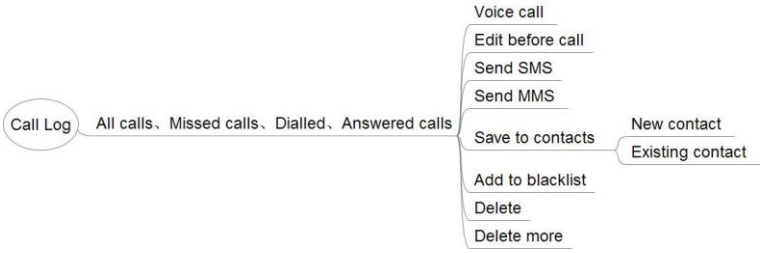
Delete
Delete the existing account.

Create new account
Create a new email account.

3.3.2 Accounts
Shows all existing accounts to select the one you would like to check.

3.3.3 Memory Status
Shows the used memory size and the free space.

4 call log



Call log records all calls, missed calls, dialed calls and answered calls.

Notice
As long as the network supports these functions, the phone can record missed calls and answered calls.

4.1 Check Call Logs

In standby screen, press **[SEND]** to access call logs.
Call logs display contact's name and phone number, times of calling from/ to the same contact. Choose a record to view the details.
If the current number is not recorded in the contacts, you can view the option menu as below:

Voice call
Call this number.

Edit before call
Copy the number to the dialer and edit it before call.

Send SMS
Send a SMS to this number.

Send MMS
Send a MMS to this contact.

Save to contacts
Add this number as a new contact; or choose recorded contact to add this number as a new contact number.

Add to blacklist
Press **[OK]** to add the focus number into the blacklist. To manage the blacklist, ***<Settings>*** → ***<Call settings>*** → ***<Call control>*** → ***<Blacklist>***, input phone code (default phone code is 0000) to finish.

Delete
Press **[OK]** to delete the log.

Delete more
Press **[OK]** to delete more call logs.
If the current numbers have been recorded in the contacts, you can view the option menu as below:

Voice call
Call this number.

Edit before call
Copy the number to the dialer and edit it before call.

Send SMS
Send a SMS to this number.

Send MMS
Send a MMS to this contact.

Contact details
View the details of the contact.

Add to blacklist
Press **[OK]** to add into the blacklist. To manage the blacklist choose ***<Settings> - <Call settings > -<Call control>- < Blacklist >*** and input the phone code (default phone code is 0000) to finish.

Delete
Press **[OK]** to delete the log.

Delete more

Press **[OK]** to delete more call logs.

Call back quickly

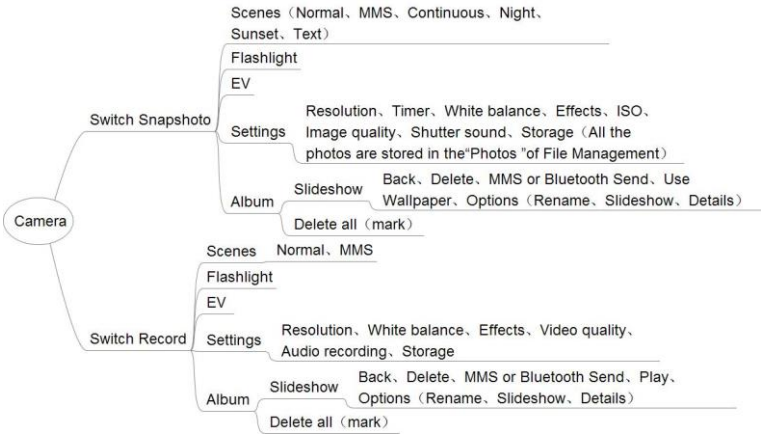
In the call log, select the number and press **[SEND]** to call back quickly.

Delete call log

In the call log, press **[LSK]**, choose ***<Delete>*** and press **[LSK]** to confirm.

If you want to delete more call logs, press **[LSK]**, choose ***<Delete more>***, select numbers to delete or ***<All>***, press **[LSK]** to delete the selected numbers.

5 Camera



You can use this menu to take pictures or adjust the camera settings. The camera is on the back of the phone and uses the screen as a viewfinder. Pictures are saved in JPG format.

Notice
You need to delete some pictures or other files in „File manager" to release space if the memory is not enough for new pictures.

The camera can be used for taking pictures (Snapshot mode) or videos (Record mode). Depending on the setting, the preview screen shows different options:

In the preview screen, press **[LSK]** or **[UP]** to view option menu:

- Switch Record/Snapshot
- Scenes
- EV
- Settings
- Album

5.1 Preview Screen in Snapshot Mode

Switch to Record mode

switch to Record mode for recording videos, activated by the **[LSK]**.

Scenes

Select one of the different modes, like below:

Normal
Should be used at normal day light, doesn't matter if sunny or cloudy.

MMS
The size of the used storage will be less, to be able to send the picture by MMS.

Dawn
Should be used during the sunrise or similar situations.

Night
Have to be used when pictures will be taken at night.

Sunset
Should be used during the sunset or similar situations.

Text
Should be used for taking phones of written parts, like news-paper, …

Flashlight

Can be switched on/off, by pressing the **[OK]** button

EV

Adjust Exposure value.

Settings

Adjust different settings:

Resolution
Select the resolution level, like: 2MP, 1.3MP, VGA or QVGA.

Timer

Select one of the times: 10sec, 5sec, 2sec or OFF.

White Balance
Possible settings: Auto, Fluorescent, Incandescent or Daylight.

Effects
Possible settings: OFF, Monochrome, Negative or Sepia.

ISO
Possible settings: Auto, 100, 200, 400 or 800.

Image quality
Possible settings: economy, normal, fine, superfine and loss-less.

Shutter sound
Possible settings: Off, sound1 or sound2.

Storage
Possible settings: phone or SD card.

Album

View your pictures and movies.

Slideshow
Select play and the slide show of all taken pictures will start.

Back
The slideshow can be stopped by pressing **[OK]**.

Delete
After selecting one picture the menu on the right side will offer different possibilities, one is delete the picture / movie. After selecting delete, the picture will be removed.

MMS or Bluetooth send
The picture can be send by MMS or Bluetooth to another device.

Use as Wallpaper
The selected picture can be used as the wallpaper by confirming with **[OK]**.

Options

Rename
Change the picture name.

Slideshow
Start the slideshow, which shows one picture after the other inside the album.

Details
Shows all the details of the picture, like size, resolution,…

Delete all
All the taken pictures can be deleted at once.

6 Media player

Notice
About Videos player, as resolution of the mobile phone is 240*320, the suggested video code rate is less than 512kbps; 3GP/MP4 Video files could play when speed is about 10 frames.

Your phone provides you a friendly Multimedia player for entertainment purpose. You can download music files from your PC, transfer music files via Bluetooth and copy the files to your micro SD card so that you can listen to music on your phone.
The media files are classified and saved according to the artists, albums, playlists and videos. In the media player screen, press **[LSK]** and select ***<Update>*** to update the media files if you need.

6.1 Options

Settings

Here the equalizer can be changed or adjusted to different sound styles.
The play mode can be selected, like normal, loop, shuffle, shuffle loop or single loop.
The sleeping mode can be activated and a time implemented for switching off the paly mode.
The lyrics display can be switched on or off.

Update

This function is updating everything related to the media player. If there is a new album added on the SD card, the update function will implement them to the album list if not done before.

6.2 Now Playing

Now playing list

Enter All Tracks list screen to add the music you like to play.

Music main menu

Go back to the Music main menu while keeping the music playing.

Add to playlist

Add the playing list to the playlist you want. If needed, you can create a new playlist.

Send via SMS or Bluetooth

Send the music via MMS or Bluetooth.

Set as

The sounds can be on different settings:

Profile ringtone
Use the selected sound/song as the ringtone.

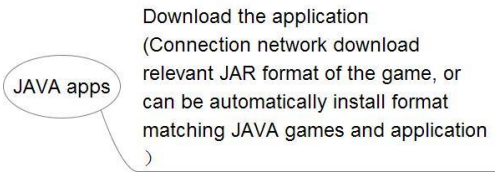
Contact ringtone

You can have on different contacts different sounds. So select a contact and add to them the sound you like. If this contact gives you a call, exactly the sound you selected will be used for the ring signal.

Listen via Bluetooth

Listen to the music via Bluetooth.

7 JAVA Apps



You can download and view all installed JAVA games and applications in JAVA menu.

8.1 Emergency Call

Notice

To launch SOS, you have to set emergency number first, and SOS on, ***<Settings>*** → ***<Emergency call>*** → ***<Number List>***. When in standby, you could start emergency call by a short press on SOS side key and afterwards a long pressing SOS side key.

This function allows usage of the SOS key on the right side of the phone. If the SOS key will be pressed for minimum 3 seconds, the phone will start ringing the implemented phone numbers from the top to the bottom inside the “numbers list”. At the same time a SMS will be sent out to the implemented phone numbers.

SOS on

The SOS function can be generally switched on or off.

Numbers list

Here five different phone numbers can be implemented. The first number has the priority 1 and will be called first. If that call is not answered, the phone will automatically call the second number, …

Edit SMS

Here the text of the SOS SMS can be implemented. The SMS will be sent out in the same way as the phone calls will be done.

8.2 Display

Theme
Different Themes can be selected.

Wallpaper
Different Wallpapers can be selected, also a taken picture can be used.

Shortcuts
You can program the five keys listed below for a shortcut when in the Homescreen.

Up key
Select your function you like to have here.

Down key
Select your function you like to have here.

Left key
Select your function you like to have here.

Right key
Select your function you like to have here.

OK key
Select your function you like to have here.

8.3 Ringtone

Selection of different tones on different functions:

Send a message out, like SMS.

Settings
Different settings can be done.

Save image
Save the current picture of the web to your IMAGE folder of the phone.

Exit
Will close the browser.

Part IV

1 Troubleshooting

If problems occur when using the mobile, please try the following tips. If the problem is not solved, please contact your vendor or i.safe MOBILE GmbH directly.

- **The mobile phone cannot be powered on**
  1. The battery voltage is too low.
     Please recharge the battery.
  2. The power on key is not pressed long enough.
     Please press power on key for more than three seconds.
  3. The connection to the battery is bad.
     Please assemble the battery again or carefully clean the contact points of the battery.
  4. The SIM card has a failure.
     Please check or replace the SIM card.

- **The phone has insufficient standby time**
  1. The battery performance is reduced because of the age of the battery.
     Please contact your vendor or i.safe MOBILE GmbH for a replacement battery.
  2. Too many programs running.
     Please reduce the number of running programs.

- **The phone is not charging**
  1. Poor electrical contact.
     Please check and replace any dirty or broken plugs.
  2. Input voltage is too low.
     Please charge for about 1 hour first, remove the plug, wait a minute and then continue charging. During this time it is possible that the phone cannot be powered on, as the voltage is too low.
  3. A battery fault has occurred.
     Please replace the battery.

- **Failures during calls occur**

1. SIM Card failures occur.
   Please check the contacts of the SIM card or replace the card.
2. Network error.
   Please change to a network provider with a stronger signal.

- **Other people are answering my calls**
  1. The mobile phone has been set into divert your calls to another phone number.
     Please check and cancel call divert.

- **The phone powers off automatically**
  1. The charge of the battery is too low.
     Please recharge the battery.
  2. There was an error during operation.
     Please restart the phone. If the problem reoccurs, please contact your vendor or i.safe MOBILE GmbH directly.

2 Maintenance

Thank you for using the **ADVANTAGE 1.x**. If there is a problem with the mobile phone, please contact your vendor or consult the service center. If your mobile phone is in need of repair, you can either contact the service center or your vendor.

Recycling

The crossed-out wheeled-bin symbol on your product, battery, literature or packaging reminds you that all electrical and electronic products, batteries and accumulators must be taken to separate collection at the end of their working life. This requirement applies in the European Union. Do not dispose of these products as unsorted municipal waste.

Always return your used electronic products, batteries and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials.

More detailed information is available from the product retailer, local waste authorities, national producer responsibility organisations, or your local i.safe MOBILE GmbH representative.

The content of this document is presented as it currently exists. i.safe MOBILE GmbH does not provide any explicit or tacit guarantee for the accuracy or completeness of the content of this document, including, but not restricted to, the tacit guarantee of market suitability or fitness for a specific purpose unless applicable laws or court decisions make liability mandatory. i.safe MOBILE GmbH reserves the right to make changes to this document or to withdraw it any time without prior notice.
